About Us

CerboTech is one of Indian's leading Research and Development Organization in the Fields of brain Skills, Cognitive Skills, Brain Computer Interface (BCI) Technology.

These programs ensure Self Improvement and Mental Wellness which helps children in better academic performance, staying confident, improving Sleeping Patterns and tackling Performance Stress and Anxiety and rise above other children.

Give your child the ability to Succeed

PROCESS OF PROGRAM

1

Brainwave
Neurotransmitter Test
(Before enrollment of module)

2

Brainhat Series

3

Brainwave
Neurotransmitter Test
(After completion of module)

Concept

We Blend Modern Technologies Like Brain Compute Interface Technology and Ancient Brain Capacity Enhancing Methodology to enhance Brain Skills.

Our programs comprise of Fun filled, Do It Yourself Activities which improve Brain Skills and help children in delivering excellent Academic Performance.

Outcomes

- Self-Improvement and Mental Wellness
- Improved Academic Performance
- Increased Positivity & Self Confidence
- Sharper Memory
- Ability to manage Performance Stress

IMPORTANT FEATURES OF OUR EXCLUSIVE TECHNOLOGY

Brain Neurocognitive Test (BNT)

- Completely Safe as Non Invasive Device Used
- Tangible and Accurate Report
- Measures Real Time Brain State
- Detailed and Self Explanatory.

Online Modules

- All Cognitive Skills **Improvement Modules** are packed with **Do It Yourself, multi-dimensional and Fun Filled Activities** to Improve Brain Skills
- Inbuilt Daily **Performance Evaluation** Report
- Activity Reminders
- **Tailor Made Modules** for Focus, Memory and other Brain Skills.

CERBOTECH EDUCATION PRIVATE LIMITED

CerboTech is a research and development organization, working in the field of developing cognitive skills.

"We have been researching in the field of brainwaves, brain skills and technologies which help in improving brain skills. We have applied technologies like Brain Computer Interface Technology and Artificial Intelligence to develop programs to measure and improve brain skills like concentration, memory, problem solving skills, creativity and critical thinking," says Shweta, adding that all programs are indigenously developed by CerboTech under the 'Make in India' initiative.

New Education Policy 2020 has put a lot of emphasis on cognitive skills. CerboTech programs complements the vision of New Education Policy 2020.

"Cognitive skills like problem solving skills, creativity, critical thinking are going to be important skills essential for academics, sports, future jobs and many more segments. CerboTech programs adds to the efforts put in by parents and schools through its Cognitive Skill Assessment and Enhancement programs," she says.

The programs developed by CerboTech has been recognized by IIT Bombay and GUSEC. For the past few months, CerboTech has developed a business partner network across India and four other countries.

"In next 5 years, we are looking forward to being a preferred partner to schools, tuition classes and other educational institutes for Cognitive Skill Assessment and Training," Shweta says.
