I tried this program for my daughter Rajvee and i have seen tremendous changes in her. Like her behaviour and her academics improves and the content of the module is very unique , designed accordingly age group. My daughter really enjoy this program specially meditation in the morning as i want her to meditation at this age and i m very happy with the result. Also the technology is very new. Proud someone from Anand and my student Sweta Prajapati doing something incredible start up.

CerboTech Education Private Limited is an extraordinary institution that is revolutionizing the way children's cognitive skills and mental health are addressed through technology and science. Their commitment to the holistic development of young minds is truly commendable. The fusion of cutting-edge technology and scientific principles at CerboTech offers a unique and effective approach to nurturing children's cognitive abilities. Through innovative programs and tools, they engage students in a way that makes learning not only educational but also fun and interactive.

I personally have seen the remarkable growth and development of my nephew who has attended Cerbotech's programs. The positive changes in his cognitive skills, emotional well-being, and overall confidence are truly remarkable. If you're seeking an institution that places the well-being and development of your child at the forefront, I wholeheartedly recommend CerboTech for an exceptional educational journey.

Awesome program.

Very simple but effective. My son did complete 15 days with full interest without reminding him on single day.

Very well organised content and perfect flow. Meditation, brain simulation, eye exercise all things very well planned.

Please enrol the course to get benefits.

thanks Cerbotech.

CerboTech's first Introduction about BCI technology and Cognitive Skill development of children was really impressive and the idea and concept regarding Child brain development and development of new habits through Online Cerbotech App is very awesome when we as parents hear in seminar.... And its actually worth to invest two months package for our both the daughter And they have enjoyed the two months process of Meditation, eye exercises, pussels , mental meths and we are happy they learn the importance of time, good habits.. they schedule thair day activities...we also observed the change in their thinking, calmness in behaviour , build self confidene . Also Before and after subscribrion had two counselling sessions of kids with parents on the basis of before and after BNT Test reports which is documentary support of children's mental and emotional growth abilities.... My daughters really have fun & learn the process and was happy to use a user friendly app, and As a parent we are satisfied with the results and thanking to the School, Cerbotech team - especially Mr. Hitesh & Miss Sweta , Mr. Chirag and the IT team.

Sweta Prajapati
